Dear Editor

I, the corresponding author of the manuscript, am enclosing herewith a paper for publication in the **Southern Journal Of Sciences** for evaluation (desk review + peer review).

With the submission of this manuscript, I would like to undertake that:

- All authors of this research paper have directly participated in the planning, execution, or analysis of this study;
- All authors of this paper have read and approved the final version submitted;
- The contents of this manuscript have not been copyrighted or published previously;
- The contents of this manuscript are not now under consideration for publication elsewhere;

- The contents of this manuscript will not be copyrighted, submitted, or published elsewhere, while acceptance by the Journal is under consideration;
- There are no directly related manuscripts or abstracts, published or unpublished, by any authors of this paper;
- My Institute's representative is fully aware of this submission.
- **ATTENTION: ETHICS COMMITTEE APPROVAL ON RESEARCH WITH HUMAN OR ANIMAL PARTICIPANTS**

Research on human participants, which includes identifiable human material or identifiable data, requires ethical protection. According to the **Declaration of Helsinki** issued by the World Medical Association, research on human participants should be clearly formulated in experimental protocols, and these should be submitted to independent ethical review boards (ethics committees and institutional review boards) for approval. Additionally, every potential participant should be informed about the "aims, methods, sources of funding, any possible conflicts of interest, institutional affiliations of the researcher, the anticipated benefits and potential risks of the study and the discomfort it may entail" and should give consent to participate.

Source: S Schroter, R Plowman, A Hutchings, A Gonzalez; Reporting ethics committee approval and patient consent by study design in five general medical journals. J Med Ethics 2006; 32:718–723. DOI: 10.1136/jme.2005.015115.

- **Authors are required to describe in their manuscripts ethics committee approval and participants consent by study design from participants when research involves human participants.**

Ethics approval must be sought for research involving human participants.

A 'participant' is someone who:

- Actively provides research data. For example:
 - ✓ Completes surveys
 - ✓ Participates in interviews, discussions or observations
 - ✓ Undergoes psychological, physiological or medical treatment or testing
 - ✓ tests software
 - ✓ Grants access to personal collections of records, photographs, etc.
 - ✓ Is the person from whom tissue has been collected (including blood, urine, saliva, hair)
 - ✓ Is identified in a record, e.g., employment record, medical record, education record, membership list, electoral roll or
 - ✓ Is identified or de-identified in data banks or unpublished human research data, e.g., analysis of existing unpublished data collected by another researcher or collected for a different research project.

- **Authors are required to describe in their manuscripts the Animal Ethics Committee approval when the study is carried out using animals.**

Animal Ethics Committees (AECs) provide avenues for public participation in the regulation of animal research. AECs are responsible for approving and monitoring research within Accredited Animal Research Establishments, including carrying out inspections of animals and facilities.

No animal research may be carried out without AEC approval. AECs must consider and evaluate applications to conduct research on the basis of the researchers' responses to a comprehensive set of questions, including their justification for the research, its likely impact on the animals, and procedures for preventing or alleviating pain and distress.

On behalf of the establishment, AECs have the power to stop inappropriate research and to discipline researchers by withdrawing their research approvals. They can require that adequate care, including emergency care, is provided for animals. They also provide guidance and support to researchers on matters relevant to animal welfare, through means such as the preparation of guidelines and dissemination of relevant scientific literature. AECs are responsible for advising establishments on the changes to physical facilities that should be made to provide for the needs of the animals used.

Does your research is based on human or animal participants?

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

If YES, please provide the Animal Ethics Committee Approval Number or Ethics Committee Approval and patient consent by study design

.....

.....

Will you require a letter of acceptance?*

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

* The acceptance letter is an **optional service** of the Journal. If the authors need a document to prove that their article has been peer-reviewed and accepted for publication, they may request, upon payment of an additional fee of USD 40, an acceptance letter for publication of the article.

NOTE 1: THE LETTER OF ACCEPTANCE may be issued **if, and only if**, the article has undergone a complete peer-review and is considered ACCEPTED for publication. Letters will NOT be issued for newly sent articles that have not yet been appropriately evaluated and peer-reviewed.

NOTE 2: The Journal does not agree with the trade-in documents that can attest to the publication of articles that have not gone through the due process of peer-review and are legitimately considered approved for publication in the subsequent edition.

NOTE 3: THE LETTER OF ACCEPTANCE may be revoked at any time if, concerns about the manuscript emerge.

Will you require formatting services?

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

This is an optional service. Not free of cost.

The submitted manuscript is a **(Select one option with a cross in the appropriate box)**

Research Article / Original Article

Ph.D. project	
Any Other (Please specify)	

Any Other (please specify).....

I am aware that the journal does not provide ahead of print publication. I will not share any type of pre-print prior to the printing of the journal.

I am aware that the journal may review my manuscript at anytime prior to the publication, and postpone or exclude it from publication if concerns are raised regarding the authorship, authenticity, or other undesirable issues that may occur.

Are you eligible for discounts and Free publication opportunities? If so, please select the appropriate check box:

a) 50% discount.

b) 100% discount.

c) Volume discount if you are an author of the journal, that has published with us 4 manuscripts (paid your full corresponded price), your fifth manuscript will be free of charge. Later the counting cycle restart.

d) Young scientists that are publishing the first manuscript of their career. Requirements: Copy of the curriculum without publications; maximum of 2 authors. (Last revision of the rule: 10/15/2020)

e) Personal related to the production of the journals (journal staff), from Brazil and abroad;

f) Longtime collaborators. The authors who published four (4) articles during the first decade of the journal, will be rewarded with one (1) free publication.

g) Paper considered by the Editors of high quality, priority, and relevance for the development of the society shall pay no fees. Note that this condition is a small recognition prize, not something that you may request. Thank you for your comprehension.

h) I am not eligible for discounts and Free publication

If the manuscript is accepted for publication, and fees are applicable to it, I prefer to receive an invoice order to pay for it using:

a) Regular bank transfer

b) Paypal

Formerly known as the Southern Brazilian Journal of Chemistry (1993 to 2021).

ISSN: 2764-5959 (Online); ISSN: 2764-5967 (Print)
© 2024. Nova Prata, RS. Brazil.

The Southern Journal of Sciences (Online ISSN: 2764-5959; Print ISSN: 2764-5967) is a multidisciplinary journal currently supported by the Araucária Scientific Association (ASA). The ASA is a non-profit group that works to encourage and spread scientific research in various fields.

This collaboration with the Southern Journal of Sciences is meant to give researchers a place to share their discoveries and help grow knowledge in their areas of study. The journal keeps strict rules for checking and reviewing articles to make sure they are high quality.

Using the skills and resources from Araucária - Scientific Association, the Southern Journal of Sciences wants to grow its influence in the science world. This partnership helps the journal get a variety of research from scientists all over the globe and encourages discussions between different fields of study.

With the backing of the Araucária - Scientific Association, the Southern Journal of Sciences is in a good spot to keep its goal of pushing for high-quality science and helping spread research results to people around the world.
